Title:**Rail Transit CCTV Hardware Supply Opportunity****Willowglen Role:**

System Integrator

Supplier Support Needed:

Hardware supply + technical support

Supplier Type:

OEMs, authorized distributors, and specialized CCTV hardware suppliers

Mandatory Supplier Expectations:

Ability to supply transit-grade or industrial-grade IP-based CCTV hardware; ability to provide technical documentation, product data, and submittals; ability to support warranty and manufacturer-backed technical support; ability to support equivalent product review where permitted; ability to support integration within a rail/transit communications environment.

Preferred Qualifications:

Prior rail or transit CCTV supply experience; experience supporting station, terminal, ancillary facility, or bus terminal surveillance deployments; experience with enterprise video management system environments; Canadian support capability.

Anticipated RFQ Release:

Current / Active Opportunity

Anticipated Delivery Window:

TBD

Current Status:

Open

Title:**Rail Transit Passenger Visual Information System Hardware Supply Opportunity****Willowglen Role:**

System Integrator

Supplier Support Needed:

Hardware supply + technical support

Supplier Type:

OEMs, authorized distributors, digital signage suppliers, and specialized passenger information system hardware suppliers

Mandatory Supplier Expectations:

Ability to supply transit-grade digital signage and associated hardware for passenger information applications; ability to provide technical documentation, product data, and submittals; ability to support bilingual passenger information display environments; ability to support integration within a rail/transit communications environment; ability to provide warranty and manufacturer-backed technical support; ability to support equivalent product review where permitted.

Preferred Qualifications:

Prior rail or transit passenger information system experience; experience with station, platform, concourse, entrance, and bus terminal signage deployments; experience with digital display hardware and associated converters/enclosures; Canadian support capability; experience supporting multi-source passenger information display environments.

Anticipated RFQ Release:

Current / Active Opportunity

Anticipated Delivery Window:

TBD

Current Status:

Open

Title:**Rail Transit Master Clock System Hardware Supply Opportunity****Willowglen Role:**

System Integrator

Supplier Support Needed:

Hardware supply + technical support

Supplier Type:

OEMs, authorized distributors, time-synchronization system suppliers, and specialized communications/control hardware suppliers

Mandatory Supplier Expectations:

Ability to supply transit-grade master clock and synchronized time-distribution hardware; ability to provide technical documentation, product data, and submittals; ability to support timing distribution over standard protocols including NTP/PTP/IRIG-B or equivalent project-required protocols; ability to provide warranty and manufacturer-backed technical support; ability to support integration within a rail/transit multi-system environment; ability to support equivalent product review where permitted.

Preferred Qualifications:

Prior rail or transit timing/synchronization system experience; experience supporting clock synchronization across communications, security, and control systems; experience with GNSS-based time synchronization and network-distributed timing environments; Canadian support capability; experience supporting integration with existing operational systems.

Anticipated RFQ Release:

Current / Active Opportunity

Anticipated Delivery Window:

TBD

Current Status:

Open

Title:**Rail Transit Passenger Assistance Intercom Hardware Supply Opportunity****Willowglen Role:**

System Integrator

Supplier Support Needed:

Hardware supply + technical support

Supplier Type:

OEMs, authorized distributors, intercom system suppliers, and specialized passenger communications hardware suppliers

Mandatory Supplier Expectations:

Ability to supply transit-grade IP-based passenger assistance intercom hardware and associated infrastructure; ability to provide technical documentation, product data, and submittals; ability to support accessible passenger communication applications, including hearing-assistance and elevator-related devices where required; ability to provide warranty and manufacturer-backed technical support; ability to support integration within a rail/transit communications environment; ability to support equivalent product review where permitted.

Preferred Qualifications:

Prior rail or transit intercom or passenger communications system experience; experience supporting station, entrance, bus facility, and elevator intercom deployments; experience with accessible communications environments and hearing-assistance features; Canadian support capability; experience supporting integrated communications/security/control environments.

Anticipated RFQ Release:

Current / Active Opportunity

Anticipated Delivery Window:

TBD

Current Status:

Open

Toronto, Ontario

Title:**Rail Transit Public Address System Hardware Supply Opportunity****Willowglen Role:**

System Integrator

Supplier Support Needed:

Hardware supply + technical support

Supplier Type:

OEMs, authorized distributors, public address system suppliers, and specialized passenger communications hardware suppliers

Mandatory Supplier Expectations:

Ability to supply transit-grade public address hardware and associated infrastructure; ability to provide technical documentation, product data, and submittals; ability to support bilingual public announcement environments; ability to support integration within a rail/transit communications environment; ability to provide warranty and manufacturer-backed technical support; ability to support equivalent product review where permitted.

Preferred Qualifications:

Prior rail or transit public address system experience; experience supporting station, platform, bus terminal, and ancillary facility announcement systems; experience with networked audio controllers, speakers, microphones, and ambient-noise compensation environments; Canadian support capability; experience supporting integrated communications/security/control environments.

Anticipated RFQ Release:

Current / Active Opportunity

Anticipated Delivery Window:

TBD

Title:**Rail Transit SCADA PLC Panels and Field Components Supply Opportunity****Willowglen Role:**

System Integrator

Supplier Support Needed:

Hardware supply + technical support

Supplier Type:

OEMs, authorized distributors, PLC and control hardware suppliers, panel fabricators, and specialized SCADA/instrumentation suppliers

Mandatory Supplier Expectations:

Ability to supply transit-grade SCADA PLC hardware, control panels, remote I/O components, HMI devices, network switching hardware, and associated field components; ability to provide technical documentation, product data, and submittals; ability to support redundant and high-availability control system environments; ability to support integration within fibre-based and networked rail/transit control environments; ability to provide warranty and manufacturer-backed technical support; ability to support equivalent product review where permitted.

Preferred Qualifications:

Prior rail or transit SCADA/PLC project experience; experience supporting station, substation, ventilation, pumping, and facility automation/control environments; experience with PLC cabinets, remote I/O architectures, HMI integration, IDS field interfaces, and industrial Ethernet switching; Canadian support capability; experience with high-availability industrial control system applications.

Anticipated RFQ Release:

Current / Active Opportunity

Anticipated Delivery Window:

TBD

Current Status:

Open

Title:**Rail Transit Backbone Communications Network Hardware Supply Opportunity****Willowglen Role:**

System Integrator

Supplier Support Needed:

Hardware supply + technical support

Supplier Type:

OEMs, authorized distributors, network infrastructure suppliers, and specialized communications hardware suppliers

Mandatory Supplier Expectations:

Ability to supply transit-grade or industrial-grade backbone communications network hardware and related components; ability to provide technical documentation, product data, and submittals; ability to support integration within fibre optic and network switching environments; ability to support equivalent product review where permitted; ability to support Canadian project delivery requirements.

Preferred Qualifications:

Prior rail or transit communications infrastructure experience; experience with fibre optic backbone environments, access/distribution network switching, and communications network hardware for critical infrastructure; Canadian support capability; experience supporting multi-system integration environments.

Anticipated RFQ Release:

Current / Active Opportunity

Anticipated Delivery Window:

TBD
